

Solutions For Churches & Communities

Tracking Intuitive Processes CEUs

Objectives: This training enhances skills for clinicians, coaches, spiritual directors, helping professionals, and other practitioners by teaching them to:

- Expand awareness beyond the boundaries of their own skin into what is not seen or known through the physical senses.
- Explore research that supports the importance of the intuitive implicit and ways to use this form of knowing in applied practice.
- Learn to access implicit knowing and open subtle awareness to allow you to track healing processes in a growing age of virtual connection.
- Enhance their own subtle senses system and leave the training with foundational skills for expanding into this larger, wise space in all of life.

To receive the 20 hours of CEUs, participants must actively complete all aspects laid out in the agendas below and complete a final evaluation form.

Setting a Center Point
